## **Continuation Sheet (PTO-303)**

Continuation of 3. NOTE: The proposed amendment would overcome the 112, paragraph one rejection of record, but would result in the application of a new rejection under the second paragraph of 35 USC 112. Moreover, entry of this amendment would not apparently overcome the art rejection. It would appear that the amendment would result in the claimed composition containing three polymers, but it also appears that two of them can be the same, which still reads on the polymer mixture of the prior art. Finally, applicants assert that there is no "latex" in the references. However, applicants' definition of the alkaline polymer includes polymers of acrylates, which are the same polymers disclosed by the prior art.
